SOaC Framework Community Edition - Quick Start Guide

⚡ 30-Second Push to GitHub

```
cd /home/ubuntu/soacframe-community-prep
./push-to-github.sh
```

That's it! The script will guide you through the process.

📋 Manual Push (5 Minutes)

Step 1: Navigate to Package

```
cd /home/ubuntu/soacframe-community-prep
```

Step 2: Initialize Git

```
git init
git remote add origin https://github.com/ge0mant1s/soacframe-community.git
```

Step 3: Configure Git

```
git config user.name "ge0mant1s"
git config user.email "your-email@example.com"
```

Step 4: Commit & Push

```
git add .
git commit -m "Release: SOaC Framework Community Edition v3.0"
git branch -M main
git push -u origin main --force
```

Note: When prompted for password, use your GitHub **Personal Access Token**, not your password!

🔑 Get Personal Access Token

1. Go to: https://github.com/settings/tokens
2. Click "Generate new token" → "Tokens (classic)"
3. Name: "SOaC Community Push"
4. Select scope: `repo` (Full control of private repositories)

5. Generate token and copy it
6. Use this token as password when pushing

✅ After Push Checklist

1. Visit: https://github.com/ge0mant1s/soacframe-community
2. Verify all files are present
3. Enable GitHub Discussions in Settings
4. Add repository description and topics
5. Create welcome announcement
6. Share with community!

📞 Need Help?

- **Detailed Guide**: See `PUSH_TO_GITHUB.md`
- **Package Info**: See `PACKAGE_INFO.md`
- **Installation**: See `INSTALLATION.md`

🎉 You're Ready!

Your community edition is fully prepared and ready to push to GitHub!
